

## **How to succeed in MA 241** (Nathan Reading, Spring 2023)

- University guidelines suggest that you work 12 hours of your time per week **outside of class**.
- The material in this class will get **more** challenging as the semester goes on.
- The successful student in this class needs to:
  - attend class.
  - read the text (before or soon after lecture).
  - Put serious effort into homework problems
  - Practice additional problems (for example, from the textbook).
  - Learn from problems on quizzes and tests (using posted solutions).
  - Get help when you need it.

**If you are doing all this already** and still not getting the outcomes you want, let me know.
